## FIELDS OF WORK

Web Development

User Interface

Graphic Design

Team Building

## EDUCATION

2012-2016      Bsc. In Computer Science  
BRAC University (**CGPA 3.56**)

2010-2012      Higher Secondary Certificate  
Govt Bangla College

2007-2010      Secondary School Certificate  
Sher-E-Bangla Nagar Govt Boys' School

## EXPERIENCE

2018-2019      Software Engineer  
Misfit Technologies

Most of my tasks were related to front-end development. I worked in Javascript framework ReactJS. Here most of the projects I had to create from scratch therefore I have good knowledge on product development and product flow. Also I have designed some of the logos for this company.

Alice Labs is a sister concern of Misfit technologies. Worked in Projects such as **Alice**, **Smart Bees & Bikri**. Worked mostly on social platform management front-end(Alice), survey Builder (Smart Bees), SME order management system (Bikri) etc.

## SKILLS

### Front end

HTML  
CSS  
SCSS  
Javascript  
ReactJS

### Back end

NodeJs

2017-2018      Software Engineer and UI/UX Designer  
Mayalogy Ltd.

Maya Apa is an anonymous messaging service where user can ask for an expert advice. I work there as a frontend developer and UI/UX Designer. One of my best experience there was working with Facebook by Maya apa's free basics site. I developed both frontend and backend also UI for their android app. Also did many frontend work like their dashboard for experts, designed UI & implemented their PWA using ReactJS.

## Design

Adobe Photoshop  
Adobe Illustrator  
Adobe XD  
Adobe Lightroom

2014-2017

Freelancer

Designer and Web Developer

As freelancer most of my tasks were related to Design such as UI Design for mobile App or Logo Design. I worked in Different Projects such as **PORI** etc also various logo for different companies.

# PROJECTS

Here are some of the project I have done so far.

March 2019 - Present

**ALICE LABS** - UI/UX DESIGN & Front-end Development

My task here was to **design product interface, logo,** maintain flow properly with backend, **develop frontend** in **ReactJS** (individual) . Currently I am Working in this project. This project maintain Social Media, Order management system for SME with additional features to help SME specially in Bangladesh.

Link: [bikri.xyz](http://bikri.xyz)

OCT 2018 - FEB 2019

**ALICE LABS** - Front-end Development

This has **two part**. I interface that can **build Survey**. Other Which **inputs the survey**. This project helps to do survey online for certain amount of reward. It has feature like skip logic etc. Project is based on **ReactJS** (individual).

Link: [smartbees.app](http://smartbees.app)

May 2018 - FEB 2019

**ALICE LABS** - UI/UX DESIGN & Front-end Development

My task here was to **design product interface, logo,** maintain flow properly with backend, **develop frontend** in **ReactJS** (initially individual later on transferred). This project helps to maintain social Platform in one place. Such as Facebook, viber etc in one place also with additional features such as broadcast, segmentation.

Link: [getalice.ai](http://getalice.ai)

JAN 2018 - FEB 2019

**Misfit Technologies Ltd** - Front-end Development & Design

Here As startup company I had to work as Designer and Developer, Initial all Graphics and Frontend projects such as their website, logo, visiting card done by me, Their Projects Consist of **iFarmer**, **Misfit Technologies** website, etc.

Link: [misfit.tech](http://misfit.tech)

JAN 2017- DEC 2018

**Mayalogy Ltd** - UI/UX DESIGN & Front-end Development

Design Their dashboard for expert. Working on Branding, Develop Website for Maya APA App. I worked on their **Freebasics** Website ( Both Front-end & Back-end laravel ) which was their no 1 platform that time.

Link: <https://maya.com.bd/>

Here are some personal & Freelanced Projects

2019

Stack: **ReactJS** (Front-end), **NodeJS** (Back-end),  
**MongoDB** (Database)

This is a basic progressive web app for reading things online and offline. It can be any notes, chapter from web novels etc. Both Frontend, Backend & Design done by me. You can add Notes, Read Notes, Delete etc. I have plan to pull data from website to store to read later. Interested? Fork the project and send PR :) Visit: [cipher-reader.netlify.com](https://cipher-reader.netlify.com)

**Backend:** <https://github.com/sazzadsazib/cipher-backend>  
 **Frontend:** <https://github.com/sazzadsazib/cipher>

2018

Stack: **ReactJS**

This project is test on making a progressive web app. You may ask what is progressive web app?

## FIELD INTERESTED TO WORK

As I've already worked as Front-end Development for 2+ year I wish to be a full-stack developer, I am trying to learn new technologies such as Server-less architecture(Lambda by AWS), GoLang etc. As my job is mostly based on front-end framework ReactJs therefore my scope from learning is from home, I have basic knowledge on JEST, NODEJS, VUEJS, JAVA, TypeScript etc. I am interested to work in a place where I would be able to learn and implement optimisation of product and I Most Importantly I love to learn new technologies.

## RESEARCH & JOURNAL

### Optimizing Apple Lossless Audio Codec algorithm using NVIDIA CUDA architecture

Paper accepted in September 2017 in SCOPUS INDEXED IJECE JOURNAL

## OPEN SOURCE CONTRIBUTION

I love open source community. They helped me learn lot of things. I've contributed in different Projects in Open Source Community.

- **NES.CSS** (★12,729 )  
<http://bit.ly/2GXvC63>

- **reactjs/bn.reactjs.org**  
<http://bit.ly/2GXkjL4>

- **React Heatmap Grid**  
<http://bit.ly/2vvRC1q>

Here are some basic packages I've on NPM

- **Cohort React Graph**  
<http://bit.ly/2lVojoY>

- **Word Cloud React**

## SHOW CASE:

Here Are some Screenshot of the projects as showcase,

The screenshot shows the Bikri platform's user interface. It starts with a landing page prompting the user to select a store or add one. This leads to a 'SELECT YOUR SHOP' screen where multiple Facebook pages are listed, including 'Alice Labs', 'Kinun: Test Page', and 'Test test'. Below this is a 'Create a new store' button and a 'Logout' link.

This screenshot displays a grid-based product management interface. It lists various products with columns for Name, Code, Sale Price, Stock, and Action. Each row includes a 'See Variants' button, an 'Update Stock' button, and an 'Update' button. The interface is clean and modern, typical of a web-based administration tool.

This screenshot shows a grid of customer records. Each row contains a profile picture, a name, a status indicator like 'ordered', and other metadata. The interface includes buttons for 'Add Customer', 'Select Tag', and 'Select type'.

This screenshot illustrates the communication and order tracking feature of the platform. It shows a list of messages from a customer named 'Sazzad Sazib'. One message says 'Your order is now confirmed.' To the right, there's a detailed view of an order with a total price of '1000 BDT'. The interface also includes a 'Select Your Product' section.

Survey Builder

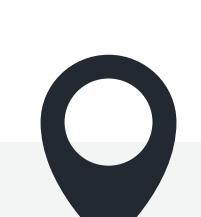

This screenshot shows the SmartBees Survey Builder interface. It features a dashboard with a pie chart for gender distribution (Male in red, Female in blue), a bar chart for age groups, and a map of South Asia with a red dot indicating a specific location.

This screenshot shows a list of survey responses. Each response includes a profile picture, a timestamp, and a message. The interface allows users to filter responses by tags and view detailed information about each entry.
